## Ex. 6 - Personal Privacy

Hello: Ex. 6 - Personal Privacy

The residential well sampling we're doing in Dimock is not random. We are focusing on the Carter Road / Meshoppen Creek Road / SR 2024 / SR 3023 area. We are only testing residential well water at this time. If you would like to review more information, we have posted publicly available documents related to the Dimock Residential Groundwater Site at [www.epaossc.org/dimock\\_residential\\_groundwater](http://www.epaossc.org/dimock_residential_groundwater). You may also review the Administrative Record File on-line which contains the documents on which EPA based its decision to sample residential wells. That website address is [www.epa.gov/arweb](http://www.epa.gov/arweb).

Sincerely,

Trish Taylor, Community Involvement Coordinator  
Hazardous Site Cleanup Division  
U.S. Environmental Protection Agency, Region 3

DearMs Taylor:

I am too concerned about which homes were tested for chemicals in the water. If the EPA did a random sampling, the results would prove inconclusive. Only the impacted homes should be tested as is the case for my neighbors on Carter Rd. Also can the EPA monitor air quality?

A few weeks ago Cabot flared a well for one week. The stench and roar was terrible, like being on the tarmac atJFK.I know it is a mix of methane and carcinogenic chemicals being burned into our formerly pristine air. Our health and livelihood are being threatened more and more every day bythe gs industry. What can the EPA do to stop this onslaught?

Sincerely,

Ex. 6 - Personal Privacy dimock Pa
